

PROHIBITED AMMUNITION

Czech Republic 2002 Firearms Act - prohibited ammunition

Under Czech law Act No. 119/2002 Coll. is **ammunition intended for short firearms (which includes .22 LR and PCC caliber ammunition) with an expanding bullet classified in category A-I – Restricted firearms**. Importing, purchasing and using this kind of ammunition in Czech Republic is allowed only to holders of a special license/exemption issued by the Police of Czech Republic - Directorate of Service for Weapons and Security Material.

Importing, holding and using this kind of ammunition without a license or permit is classified as breaking of Czech gun law with legal consequences.

In the Act mentioned above, we strictly require all competitors to import and use ammunition loaded ONLY with FMJ (Full Metal Jacket), LRN (Lead Round Nose), or projectiles with a similar type of construction during match.

Ammunition loaded with projectiles holding soft point and/or expanding cavities at the point (covered by plastic tip or uncovered), like HP (Hollow Point), JHP (Jacketed Hollow Point), HPBT (Hollow Point Boat Tail), JSP (Jacketed Soft Point), including homogeneous material projectiles, will not be allowed during match.

If you are not sure if your ammunition follows the Czech Firearms Act, please contact organizers at the following e-mail: Ws2025@ipsc.cz

Examples of restricted types of projectiles / ammunition:
